SECTION I

STATE DESCRIPTION -- LOUISIANA

The state of Louisiana is composed of 64 parishes. It ranks thirty-first in land area (48,523 square miles) and has a population of 4,358,422. It is located in the extreme south central part of the United States, bounded on the west by Texas, on the north by Arkansas, on the east and northeast by Mississippi and on the south by the Gulf of Mexico.

Louisiana blends a wealth of historic charm, rich natural resources and giant modern industries. Fertile soil, adequate rainfall, temperate climate, an ample and adaptable labor force, navigable waterways and excellent highway systems are factors basic to the state's wealth.

The northern part of the state is higher, with rolling hills and valleys. The central portion is characterized by flat delta land suitable for agriculture. The southern section has many coastal marshes, bayous and generally low and flat terrain. This variety of land types encourages an equally wide variety of both agricultural and industrial pursuits. The proximity of the state to the Gulf of Mexico and its strategic location at the mouth of the Mississippi River provide the necessary inlet and outlet for worldwide commerce involving both raw materials and finished products.

LOUISIANA BACKGROUND AND ASSUMPTIONS

Because of several unique circumstances and conditions, Louisiana has shown itself to be able to weather the economic fluctuations of these unstable times better than some of the other states. However, Louisiana's unemployment rose slowly but inexorably byt 1.9 percent for an average for 1982 of 10.3 percent, slightly higher than the national unemployment of 9.7 percent.

A high percentage of personal income in Louisiana comes from production of non-durable goods, products which are constantly used up and in continuous demand, whatever the state of the general economy. Though wages paid in durable goods manufacture are generally lower, these industries are more vulnerable to economic fluctuation.

During 1982 a change in the labor force aspect has occurred. Total employment has declined and unemployment has increased. This is a reversal of a heretofore very consistent trend. Manufacturing industries have shown almost total responsibility for this reversal. Durable goods manufacturing showed the largest drop in employment, while non-durable goods industries experienced a noticeable but not so large decrease. Although construction industries showed a considerable decline in employment, this was offset by a similar gain in service industries. In total, nonmanufacturing industries showed practically no change at all.

Nevertheless, Louisiana's economy is far from moribund. The potential and the means for economic growth remain.

New Orleans and Baton Rouge are leading ports in the nation. Through these facilities move many Louisiana products - lumber, building materials, wood products, sugar, rice, cotton, wood pulp, paper, stone, clay and glass products, machinery, chemicals, food products, oil and fabricated metal products. Coal shipping is a new but growing industry here. The LOOP offshore oil unloading facility is active operation, although a worldwide drop in oil prices has caused some distress in Louisiana's oil industries. At present two nuclear powered electricity generating plants are under construction in the state. Production of natural gas, sulphur and salt is still important. The state has many unique attractions for those who visit. New Orleans has planned a World Fair in 1984. Preparations for this event and the conducting of this event should provide welcome economic impact for many industries and business involved in and affected by this event.

In the Baton Rouge, Lafayette, New Orleans and Shreveport metropolitan area the average unemployment rate still lingered below 10 percent, with Lafayette the lowest at 5.2 percent. A new metropolitan area including the cities of Houma in Terrebonne Parish and Thibodaux in Lafourche Parish has become recognized.

Any favorable trend in the national economy or the world or national geo-political complexion may bring about a turnaround and upsurge in the Louisiana economy.

The average civilian labor force in Louisiana decreased from 1,857,000 in 1981 to 1,856,000 in 1982. The unemployment rate increased 1.9 percent to an average 10.3 percent. The national unemployment rate averaged 9.7 percent.

The average non-agricultural wage and salary employment decreased by 16,500 persons, from 1,630,500 in 1981 to 1,614,000 in 1982. This represents a drop of 10.1 percent. This loss was indicated mainly in manufacturing industries which showed a decrease of 7.4 percent. Nonmanufacturing industries remained almost unchanged.

Average weekly wages in manufacturing industries rose from $362.08 in 1981 to $384.58 in 1982.

SECTION II

Population Changes in Louisiana

During the decade of the 70's Louisiana has shown marked and significant population growth and changes. Tables on pages 14 and 15 present 1982 census population totals by parishes and by major labor market areas. These totals have been broken down by race and sex.

The most marked population increases are shown in parishes containing or bordering on several of the growing metropolitan areas. This is a polarizing effect, with population clustering around the areas of high labor need and activity and high wages. Of the nine parishes which form Louisiana's border with Mississippi, only four show very slight population decreases since 1970. These, with an adjoining parish, West Carroll, which also showed a slight decrease, are largely rich delta and rural areas. The population loss in Tensas Parish, the largest loss among these parishes, was 12.4 percent. The loss in the other parishes was less than 5 percent. This would indicate that the population shift may be stabilizing.

While still the state's largest and most populous city, New Orleans has shown a slight decline in population. Limitation and congestion of residential areas in the city has resulted in an overflow of residents into bordering Jefferson, St. Bernard and St. Tammany Parishes. Two causeways across Lake Ponchartrain connect New Orleans with St. Tammany Parish, and a recently completed express highway around the end of the lake makes easy access to Tangipahoa Parish. Since 1970, St. Tammany Parish has increased in population by a striking 73.9 percent, the largest gain in the state. Jefferson Parish, especially the area adjacent to New Orleans, has room to expand and has done so by 34.4 percent. St. Bernard Parish is somewhat limited in available growing area, but has a relatively high concentration of industry and has grown by 24.2 percent since 1970.

Baton Rouge is a growing city, rapidly expanding into the less populated parts of East Baton Rouge Parish and drawing population into adjacent parishes. East Baton Rouge Parish has shown a growth in the past decade of 28.4 percent, Ascension Parish grew by 35.0 percent, West Feliciana Parish by 13.2 percent, and Livingston Parish by 70.0, the second largest parish increase in the state. It would be reasonable to expect that East Feliciana and Iberville Parishes will continue to experience increases also.

Between Baton Rouge and New Orleans along both banks of the Mississippi River is an almost continuous complex of petrochemical and related industries drawing population to the parishes of St. Charles, St. James and St. John.

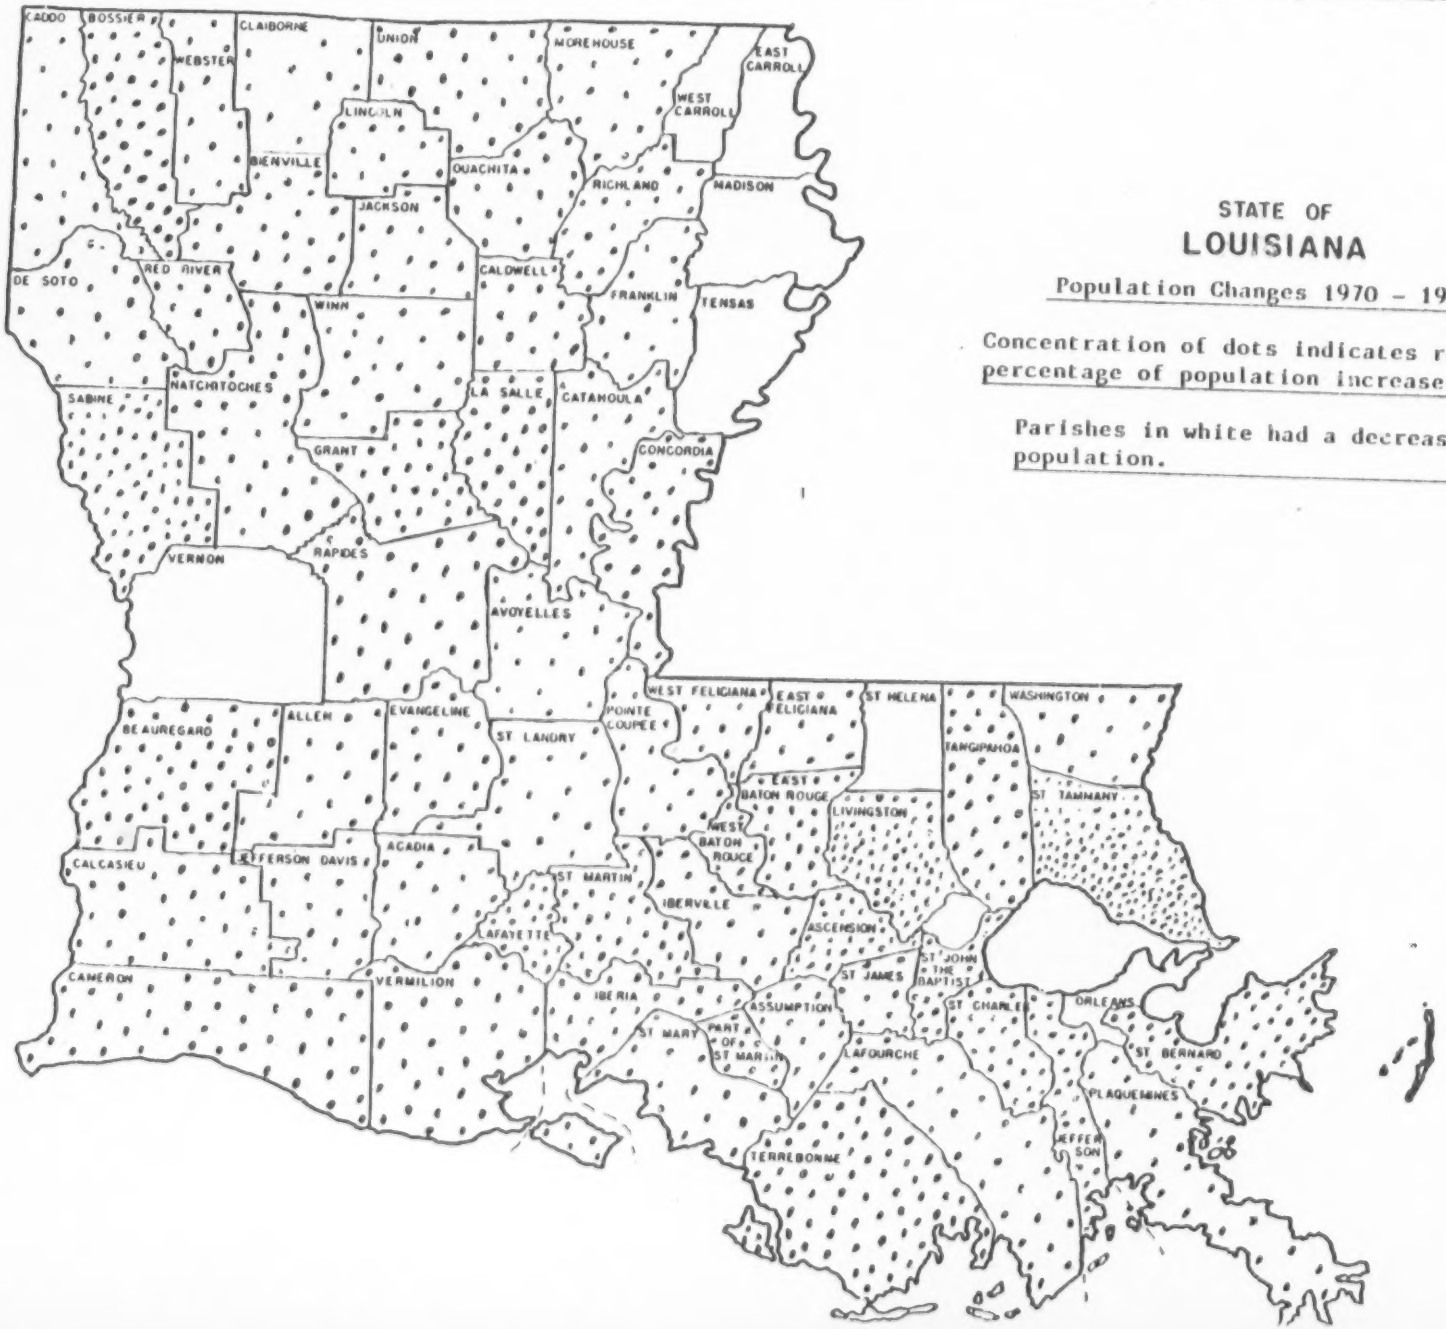
Lafayette is a growing city with much potential for growth and importance. The population of Lafayette Parish has increased by 34.4 percent in the last decade. Because of its proximity to the Gulf of Mexico and excellent highway connections to surrounding areas, Lafayette has become headquarters for many offshore drilling operations and is becoming increasingly involved in the petroleum industry and related industries.

The city of Lake Charles, in Calcasieu Parish, also has direct access to the Gulf of Mexico and is a hub of petrochemical industries. Population growth in this area has not been as marked. This may be due to the situation of Lake Charles between the bustling Lafayette and the large centers of petrochemical industry across the border in southern Texas. Still, Lake Charles is a growing city with much industrial activity.

In the northwest corner of the state are Caddo and Bossier Parishes, sharing the adjoining cities of Shreveport and Bossier City. Although Shreveport is the third largest city in the state, Caddo Parish as a whole has shown a growth since 1970 of 9.6 percent, while Bossier Parish has been increasing at a healthy 22.5 percent.

Vernon Parish, centrally located on the western border of the state, has shown a slight population loss of 1.4 percent. The establishment of Fort Polk as a permanent military installation has not attracted much population, as the rest of the parish is largely rural.

Though the trend of population change in Louisiana is evident as the state has changed in many areas to a more industrial economy, this trend may be stabilizing.



STATE OF

LOUISIANA

Population Changes 1970 - 1980

Concentration of dots indicates relative percentage of population increase.

Parishes in white had a decrease in population.

Parishes with a population in excess of 100,000 for 1982, with their largest cities indicated, are listed below:

Orleans Parish	(New Orleans)	550,734
Jefferson Parish	(Metairie)	486,688
East Baton Rouge Parish	(Baton Rouge)	387,286
Caddo Parish	(Shreveport)	257,227
Calcasieu Parish	(Lake Charles)	172,277
Lafayette Parish	(Lafayette)	161,231
Ouachita Parish	(Monroe)	145,065
Rapides Parish	(Alexandria)	139,261
St. Tammany Parish	(Slidell)	127,980

The total population of the state for 1982 is projected at 4,358,422, an increase of 8.26 percent since 1980.

CONSUMER PRICE INDEX

The Consumer Price Index, sometimes called the "Cost of Living Index" is a monthly measure of the average change in prices in a fixed quantity of goods and services. Prices are gathered from 85 areas across the country. The year 1967 is used as the base period. While the CPI may provide a broad outline of price fluctuations, it cannot reflect individual buying trends or regional experiences.

Note: Estimates of Nonagricultural Wage and Salaried Workers are prepared in cooperation with U.S. Department of Labor, Bureau of Labor Statistics, and include all full and part time workers who were employed during the pay period including the 12th of the month, by place of employment. These estimates are based on a first quarter 1982 benchmark.

* In this series government includes public administration as well as all other government- operated services.

Note: Estimates of Nonagricultural Wage and Salaried Workers are prepared in cooperation with U.S. Department of Labor, Bureau of Labor Statistics, and include all full and part time workers who were employed during the pay period including the 12th of the month, by place of employment. These estimates are based on a first quarter 1982 benchmark.

* In this series government includes public administration as well as all other government-operated services.

1/ EFFECTIVE WITH DATA RELEASED FOR JANUARY, 1977, ALL HOURS AND EARNINGS STATISTICS PUBLISHED BY THIS AGENCY ARE BASED ON THE 1972 ISSUE OF THE STANDARD INDUSTRIAL CLASSIFICATION MANUAL.

THESE SERIES ARE ADJUSTED TO A FIRST QUARTER 1982 BENCHMARK AND WERE COMPILED BY THE RESEARCH AND STATISTICS UNIT OF THE LOUISIANA DEPARTMENT OF LABOR IN COOPERATION WITH THE U. S. DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS. DATA ARE FOR FULL AND PART-TIME PRODUCTION WORKERS WHO WERE EMPLOYED DURING THE PAY PERIODS ENDING NEAREST THE 12th OF EACH MONTH. EXCLUDED ARE PROPRIETORS, FIRM MEMBERS, AND EXECUTIVE EMPLOYEES. AVERAGE EARNINGS ARE GROSS, REFLECTING CHANGES IN BASIC HOURLY AND INCENTIVE WAGE RATES, PREMIUM PAY FOR OVERTIME WORK, AND SHIFT DIFFERENTIALS. WORK WEEK INFORMATION RELATES TO AVERAGE HOURS WORKED OR PAID FOR.

SECTION VIII

CHARACTERISTICS OF THE ECONOMICALLY DISADVANTAGED

An economically disadvantaged person is one who is a member of a family which receives cash welfare payments or whose annual income in relation to family size and location does not exceed the established poverty levels listed below. As of May 1983.

Family Size	Poverty Guideline
1	$ 4,860
2	6,540
3	8,220
4	9,900
5	11,580
6	13,260
7	14,940
8	16,620

For family units with more than 8 members, add $1,680 for each additional member.

Please notice that there is no longer a distinction between Farm & Non Farm Family.

SECTION IX

LABOR MARKET INFORMATION

In addition to other services, the job service provides labor market information to the public and other governmental agencies. Below is a partial list of publications giving various types of labor market information.

DICTIONARY OF OCCUPATIONAL TITLES (DOT)

This document provides approximately 20,000 job descriptions in 1,371 pages. This volume is of particular use to those engaged in career counseling and job planning and can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

OCCUPATIONAL OUTLOOK HANDBOOK

This handbook is published by the U.S. Department of Labor, Bureau of Labor Statistics. One section gives the outlook for the economic situation for the next few years. Another section describes each occupation according to types of work, qualifications needed, and other factors.

OCCUPATIONAL EMPLOYMENT FOR SELECTED NONMANUFACTURING INDUSTRIES

This publication provides estimated occupational employment for selected nonmanufacturing industries and can be obtained by contacting the Louisiana State Department of Labor, Research and Statistics Unit. A handbook for manufacturing industries is also available.

ANNUAL PLANNING REPORT (APR)

This report is a manpower report prepared each year. It includes employment and unemployment trends and expectations. This report can be obtained from the Administrative Office, Research and Statistics, of the Department of Labor.

MANPOWER INFORMATION FOR AFFIRMATIVE ACTION PROGRAMS

This publication gives labor force data by sex, race, and ethnic group for the state of Louisiana and for individual labor market areas and is prepared by the Louisiana Department of Labor, Research and Statistics Unit.

LOUISIANA LABOR MARKET INFORMATION

This newsletter, provides data on employment trends and analyzes local economic situations on a statewide basis and in seven major urban areas of the state and can be obtained from any Job Service Area Office.

LICENSED OCCUPATIONS IN LOUISIANA

This publication provides up to date general information on occupations licensed in the state, licensing of certain business activities and processes and the sale of certain products.

LOUISIANA EMPLOYMENT PROJECTS - 1990

This publication includes projections which offer estimates based on job openings in 1980 and projected 1990. These projections should help both applicants and employers to better meet the demands of the future.

SECTION X

EXPLANATORY MATERIAL

The information presented in this document was compiled by the La. Department of Labor, affiliated with the U.S. Department of Labor.

An explanation of some of the terminology used in this report follows:

LABOR AREA: A labor area is a geographical area consisting of a central city or cities and the surrounding territory in which there is a concentration of economic activity and in which workers can usually change jobs without changing their residence.

CIVILIAN LABOR FORCE: The civilian labor force represents the sum of the employed (exclusive of the Armed Forces), the unemployed, and persons involved in labor-management disputes.

EMPLOYMENT: Employment estimates are developed mainly from a sample of establishments which report regularly on their employment. These estimates are periodically compared with comprehensive data on employment obtained from tax records, which provide benchmarks for the various non-agricultural industries. Appropriate adjustments are made as needed.

NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT:
Nonagricultural Wage & Salary employment refers only to employees on establishment payrolls during the sample week in each month (this week always includes the 12th of the month) and excludes self-employed, unpaid family workers, and workers involved in labor-management disputes.

ALL OTHER NONAGRICULTURAL EMPLOYMENT:
This category includes persons who work in non-farm industries who are not reported on payrolls, such as self employed workers, domestic workers in private households, and unpaid family workers.

UNEMPLOYMENT: Unemployment data included in this report are concepturally comparable with those released by the United States Department of Labor each month for the country as a whole. The unemployment estimates include all workers not at work but actually seeking work. Unemployed workers are counted by their place of residence. The unemployment rate represents the number of unemployed as a per cent of the civilian labor force.

APPLICANTS: Applicants are individuals who are registered with the local Job Service Office and are reasonally representative of the available worker supply in most occupational categories and for most sections of the area.

PLACEMENTS: Placements occur when a local Job Service Office, which has an employer job order, refers a qualified applicant to the employer and verifies the fact that the applicant has been hired by the employer.

SECTION XI

Job Training Partnership Act

The Job Training Partnership Act (Public Law 97-300-Oct. 13, 1982) is replacing the Comprehensive Employment and Training Act of 1973 as the nation's major employment incentive program. The purpose of this Act is to establish programs to prepare youth and unskilled adults for entry into the labor force and to afford job training to those economically disadvantaged individuals and other individuals facing serious barriers to employment, who are in special need of such training to obtain productive employment.

Under the Job Training Partnership Act, many responsibilities formerly carried out by the Federal Government devolve to States and local labor markets. The Governor has approval authority over locally-developed plans, and is responsible for monitoring local program compliance with the Act. In addition, a new public/private partnership is created to plan and design training programs as well as to deliver training and other services.

SERVICE DELIVERY AREAS, designated by the governor, based upon recommendations of the State Job Training Coordinating Council, will deliver services under the Act. Sixteen of these areas which include the entire state, have been designated in Louisiana. Planning functions of both the Governor's representatives and the service delivery areas will require considerable statistical information including the characteristics of populations in the respective areas. An initial attempt has been made here to furnish basic, and in some cases tentative information that will aid planners in the initial steps of formulating their individual programs.

In the case of labor force data, unrounded figures have been shown since allocation procedures require their use rather than the normally published rounded information.

6-6-83

R & S JTPA FIELDS, DEFINITIONS, REFERENCES AND SOURCES

SDA No.	Service Delivery Area number. Derived from State Planning District numbering system with certain deviations such as cases of Vernon and St Tammany Parishes
PARISH	Geographic area of SDA (either city or parish)
POP	1980 Total population figures from the U. S. Bureau of the Census. (Source: Summary Tape File 1 A, La. State Data Center)
